

Dr Jose Luis Górriz is Head of Nephrology at Hospital Clínico Universitario de Valencia and Professor of Medicine at the University of Valencia. He leads several national and international projects focused on the early detection and risk stratification of chronic kidney disease, including large scale population screening initiatives based on integrated clinical data systems. His work has pioneered sentinel algorithms for opportunistic CKD detection in high risk populations, improving timely diagnosis and referral pathways. He has coordinated multiple multicentre studies and innovation programmes aimed at implementing early CKD detection strategies in routine clinical practice across Spain.

Dr Górriz has published 251 articles, according to PubMed, which have generated 10,120 citations, according to Google Scholar. His h index is 50.
